

Funded qualifications for mentoring and personal development

Communication Matters has been successful in receiving a grant from the National Lottery Community Fund to deliver **Level 1 in Mentoring** and **Level 1 and/or Entry Level 2 or 3 in Personal & Social Development** qualifications for AAC users over the next four years and to help set up local mentoring schemes.

The route to being an effective mentor includes opportunities to develop other related skills and understanding through Personal & Social Development.

This is very exciting as we know that many AAC users would welcome the opportunity to be supported by another AAC user who understands their concerns and aspirations and who may be able to spend time working together.

Some comments from our trainee mentors:

“ The opportunity to do these courses from home is really good for me ”

“ A well-structured course, everything has been good for me ”

“ I’m looking forward to mentoring at school, I really enjoyed the course ”

The qualification consists of a variety of units and topics and we are able to fund all the learning materials, qualification registration, assessment and certificates and support

[UPDATE: due to COVID19, we are now offering these courses via distance learning](#)
